**WWW.PROPOOLPRO.COM**

While enjoying an evening swim, experience an array of brilliant water colors that transport your imagination to special places reminiscent of lush emerald islands, Caribbean seas, or the luxurious feeling of floating in soft warm rose petals.

**Welcome to the world of underwater LED lighting.**

Professional Pool Products lead the industry in offering the latest in LED lighting technology, providing the widest spectrum of color choice, excellent build quality and a unique design.

Our lamps come with a remote control option with built-in transformers – this makes it exceptionally straightforward for pool builders and end users. Making a color choice is very simple; you can scroll through the fixed and animated modes by simply clicking a button.

**Options & Choices**

**Size - 170mm Diameter**  
 Available in one size at the moment. We are developing various other sizes (both, bigger and smaller) which will become available soon.

**Material - Stainless Steel Or Plastic**  
 Both options offer extreme durability and are equally reliable materials. Stainless Steel offers a classier look, while plastic offers uniformity with other pool fittings and is more economical.

**Color - RGB Or Double White**  
 RGB will transform your pool into an oasis of glowing colors - control your mood with the simple push of a button.  
 Double White is for those who prefer the traditional approach. Three modes offer Super White, Warm White & a combination of the two - Double White.

Red    Green    Blue    Aqua    Yellow    Purple
